

# Year 11 Bridging Work – Human Geography

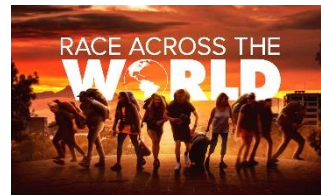

## Things to do

- Find out the world's 20 biggest cities by population and mark them on to a world map
- Think of all the urban challenges you looked at during GCSE urbanisation topic – can you rank them from most serious to least serious challenge? How do challenges vary between cities in HICs and cities in LICs/NEEs? Think ec/soc/env
- Produce a fact file of a city in a LIC/NEE and a city in a HIC. We suggest Lagos in Nigeria, and New York in USA. Include location, population, what makes that city important, opportunities, challenges and schemes to improve lives of people living there.
- Research the impact of coronavirus on cities around the world – e.g. positive environmental impacts but negative economic impacts – how is this different in HICs and LICs?
- Research the global response to coronavirus – what role has the World Health Organisation played? How have different countries responded in different ways?
- Spider diagram of how you are linked to the rest of the world
- Explore the 'Gapminder' website – see what different factors can affect life expectancy, GDP and other development indicators
- Google map games

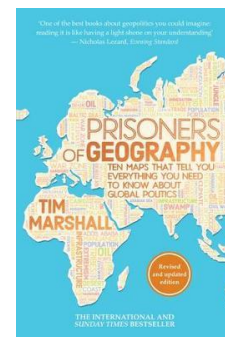

## Things to watch

- Andrew Marr's megacities – three episodes on Vimeo
- Race across World – BBC iPlayer
- Seven Worlds One Planet- BBC iPlayer
- Top Gear special editions – BBC iPlayer
- National geographic documentaries – YouTube & National Geographic website
- Hans Rosling's 'Don't Panic – The Truth about population' - YouTube

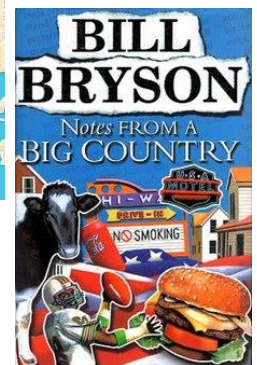

## Things to read

- National Geographic – World's most improbable green city (online article)
- Danny Dorling – Inequality and the 1% (book)
- Billy Bryson – Notes from a ....small island/big country (book)
- Tim Marshall – Prisoners of Geography (book)
- Hans Rosling – Factfulness (book)

article)
